Investment Objective

The Fund's objective is to provide safety of principal, adequate liquidity and competitive yield with low return volatility.

Investment Strategy

The Fund seeks to achieve its objective by investing in a variety of stable value investments such as Guaranteed Investment Contracts and security backed investment contracts issued by high quality financial institutions (AA rated or higher) as well as stable value collective funds and money market funds. Security backed contracts are backed by high quality, marketable fixed income securities which provide a credited rate of interest based on the yields of the underlying securities. The underlying fixed income security exposure is obtained by investing in collective funds managed by the sub-advisor for this purpose or may be purchased directly by the sub-advisor. Securities backing investment contracts are all investment grade at time of purchase with a minimum average quality rating of AA. The various investments that make up the portfolios are blended together to provide a combined daily accrual rate, net of all Fund and portfolio expenses.

Risks

There is no guarantee that the fund will meet its investment objective. While the fund strives to maintain stability of principal, it is possible to lose money by investing in this fund.

Transfers from the Fund to other investment options are allowed at any time, provided:

---The transfer is not directed to a competing investment option;

---A transfer into a competing investment option from any non-competing investment option, or a partial surrender, has not occurred within 90 days.
